

2ND AVE MOBILITY IMPROVEMENTS

Signal upgrades and protected bike lane extension

PROTECTED BIKE LANE INSTALLATION

On Monday, September 18, crews plan to start installation of the protected bike lane on 2nd Ave from Blanchard to Pike streets. For approximately 2 weeks, crews will grind and repave the road in the parking lane, bike lane, and adjacent travel lane, on the east side of the street, beginning at Blanchard and moving south to Pike. **While crews are working, parking and load zone restrictions will be in place on the east side of 2nd Ave from Blanchard to Pike.** After this work is complete, 2nd Ave between Blanchard and Pike will have a new lane configuration (see the existing and future conditions on back page).

UPCOMING CONSTRUCTION SCHEDULE

Monday, September 18: Crews will grind the road to remove the top layer of asphalt between Blanchard and Pike. This work will take approximately 1 day to complete.

Starting Tuesday, September 19: Crews will prepare the road and install new pavement and concrete barriers (the buffer between the protected bike lane and the parking lane). This work will take approximately 2 weeks.

Pavement restoration is weather dependent and may be rescheduled.
